

# Sponge UK Developer Test

In order to run this test, you must either host this project on a web server or enable local file execution in your browser. To enable the requests with the protocol of `file:///`, please follow the instructions [here](#).

For this test, you will need:

- An IDE of your choice (e.g. [Sublime Text](#))
- A web browser (e.g. [Chrome](#))
- An image editing application (e.g. Photoshop or [GIMP](#))
- A copy of Microsoft Word (for opening the example text - you may be able to use [Google Docs](#) instead)

If you can't change your browser settings to allow locally-hosted files, you will also need a local web server:

- [WAMP](#) - Windows, Apache, MySQL, PHP
- [MAMP](#) - Mac, Apache, MySQL, PHP
- [Fenix](#)
- [LightTPD](#)
